Github: github.com/niyashameer

## EDUCATION

---

- **University of Liverpool** Liverpool, United Kingdom  
*Masters of Science Information Management [Remote - ongoing]* October. 2025 – present
- **SRM Institute of Science and Technology** Chennai, India  
*Bachelors in Technology Computer Science Engineering [CGPA: 9.5]* July. 2020 – July. 2024

## EXPERIENCE

---

- **CERN** Geneva, Switzerland  
*Full Stack Developer* Oct 2024 – Present
  - **TREC: Develop and maintain** a website used to track and safeguard potentially radioactive equipment at CERN, with a focus on **secure access control** in the application layer. **Deployed** an **Internal Transport Module**, a key tool in the Scheduled **Long Shutdown** Maintenance, using **React (TS)**, **Java Spring (security, boot, etc.)**, **Oracle SQL**, and other internal tools.
  - **NORMA DB: Lead developer and Project Lead** – involves regular client meetings to help understand their needs. A web application containing catalogues of the different NORMA magnets used at CERN. Migrated the application to modern frameworks and **normalised and migrated the data** to EAM (Enterprise Asset Management) standards, ensuring data integrity throughout the transition.
  - **ePool**: Develop and maintain a website for renting electronic equipment at CERN, including usage and inventory reporting features. [React, Java Spring Boot, etc.]
- **CERN** Geneva, Switzerland  
*Technical Student — Software Developer* Oct 2023 – Sep 2024
  - **Track-it: Sole developer** responsible for maintaining, updating, and making key technical decisions for the website that **coordinates** activities across multiple engineering groups at CERN working on the Accelerator Complex. [React, Java EE]
- **Quinence** Singapore, Singapore  
*Frontend Intern* Nov 2022 – Jun 2023
  - **Frontend Development**: Built and maintained the first prototype frontend of websites, primarily using Remix with Tailwind CSS and TypeScript.

## STUDENT PROJECTS

---

- **Circles – iOS Application in collaboration with Apple (06/2022 – 06/2023)**: Worked with a group of peers in a student-led cohort supported by Apple to build Circles, an app to help organize plans. Designed in **Figma** and developed using **SwiftUI**. Later presented the app to Apple professionals and community members, including media and news outlets.
- **Personal Portfolio**: Currently under development, improving version 1.0. GitHub: github.com/niyashameer/portfolio. Tech stack: TypeScript, Next.js, Sanity, Tailwind CSS, Lottie animations.
- **GreenArray – Mozohack (07/2022 – 12/2022)**: Hackathon project addressing the lack of access to strategies for increasing urban green spaces. Tech stack: Express.js, HTML, CSS.
- **Atypical**: A social platform for individuals on the spectrum/neurodivergent, helping them connect, stay motivated, and share guidance based on personal experience. Tech stack: Material UI, React, Node, TypeScript, Express, Tailwind CSS.
- **Alexa Developers, SRM (07/2021 – 09/2023)**: Developed Alexa Skills and honed web development skills by working on student websites. Served as **Project Manager** for the Skilltober website, a Hacktoberfest event. Tech stack: React, Next.js, JavaScript, TypeScript, HTML, CSS, Tailwind CSS.

## PROGRAMMING SKILLS

---

- **Languages**: Java, JavaScript, TypeScript, C++, Python, SwiftUI
- **Web Development**: Spring Boot, React, Next.js, Node, HTML, CSS, Tailwind CSS, Material UI, SASS, Remix
- **Tools**: Oracle DB, Mongo DB, Supabase, Cloudflare, Kubernetes, Camunda
